PERSONAL SKILLS

PROFESSIONAL SKILLS

Thanks to the wide range of my skills in various areas (graphics and design, statistics, programming, marketing) I can manage easily a multitude of project types, and solve complex problems using (and thinking to use) different technologies; with these skills I can cover many roles, depending of current company / customers goals: Project manager, Web Developer, Graphic Designer, 3d artist, and so on.

High skills to manage many projects at the same time.

Dynamic and with high attitudes for relationships.

High skills to full project management: starting from the first contact with Customer until the final delivery.
At the same time, flexible and helpful with my colleagues for a valuable teamwork.

High skills to develop web marketing strategies

Project analysis, copywriting and skills to write report documents for consulting works, commercial documents, software user manuals.

High skills into GUI (graphic interfaces) design developing for windows / mobile and web applications

High skills in webdesign and dynamic contents integration

Web mastering, websites management and maintenance, consultino about technical and strategic developments.

High Skills in Web Marketing and search engines optimization tools and solutions, strategic and cost-benefits analysis, website code optimization, manual search engines indexing, "below the web" procedures, results monitoring and skills in writing/understanding reports and analysis in shot-medium-long period

Videogames: experiences in game concept, level design, skills and knowledge of many programmino algorithms and problem solving about game developing processes for web, windows and mobiles. Advergames, Mobile Games and

experiences in graphic contents in 3d, pixel art / tile based worlds and problem solving about final devices hardware and software limitations.

Web programming (ASP and Flash actionscript);

3d modeling, renderings and animations for printing or video purposes, presentations, virtual worlds. High skills to finalizing my work to website publishing, for example to create 3d high impact interactive contents.

CDROM and DVD authoring: video production, navigation menu design and implementation for professional DVD and CDROMs.

Mobile applications: high skills in Adobe Flashlite / Flash programming for mobile phones, internet tablets and pocket pc
